## Soil-net.com

## **Activity:** SoilScapes Viewer

http://www.landis.org.uk/soilscapes/

Do you want to find out about the soils where you live? SoilScapes helps you do just that!

SoilScapes is an interactive online viewer for the soil map for England and Wales. This is a fantastic way to learn more about the soils in your region, and across the two countries. Input your postcode and discover more about the soil under your

Feet.

instructions.

information tab

The use of maps is important in describing landscapes and soil environments. SoilScapes provides students access to Internet-based soil mapping tools to allow investigation of location and variation of soil and other environmental properties around a location. This tool also promotes how to use and interpret cartographical elements

such as mapping, North arrow, legends, scale and the wider use of secondary sources and ICT-based environmental investigation tools.

Curriculum Keywords: map, soil, north, south, east, west, scale, distance, key, Symbol

The Soilscapes Viewer is intended for educational purposes and personal research. The soils data available through this system is © Cranfield University (NSRI) 2006. To use the maps and information from this site for a commercial purpose (i.e. inclusions in reports, or for commercial gain) a publications licence or reproductions licence will be required.
